# RecordPoint™

# BOX GOVERNANCE

Seamless and high-speed management of content

## CONNECTIVITY WITHOUT COMPROMISE

Records365 leverages a Box Enterprise App for authorization to seamlessly manage your enterprise content, in place, without interfering with the familiar user experiences and integrations that Box offers. Connectivity for users is always directly to Box and without application overlay or performance impacts.

# box

*The Records365 Box Connector is a high-performance policy management engine for Box Enterprise that provides seamless and high-speed management of content, including lifecycle management and policy enforcement.*

## FEATURE SET

### Automated Policies

Full automated classification & retention

Identify 'unclassified' records

Target sites, libraries, types & metadata

Manage legacy file shares and social records

### Records Management

File plan management

Retention and disposal schedules

Physical & hybrid records management

Location tracking & barcoding

### Preservation and Archiving

Disposal management processing

Long term archival preservation

E-discovery & legal holds management

Record export and import/transfers

### Platform Extension

Improved security & governance

Inbuilt dashboards and alerts

Extensive search capabilities

Central web-based management console

*Learn more at RecordPoint.com*

## ARCHITECTURE

The Box Connector is based on the Records365 Connector framework which is a high throughput platform for applying in-place records management and policy to content within Box.

Connectors monitor and manage content sources and notify Records365 when content is added, changed or deleted. These are submitted to Records365 for change management and lifecycle events, including automated disposition.

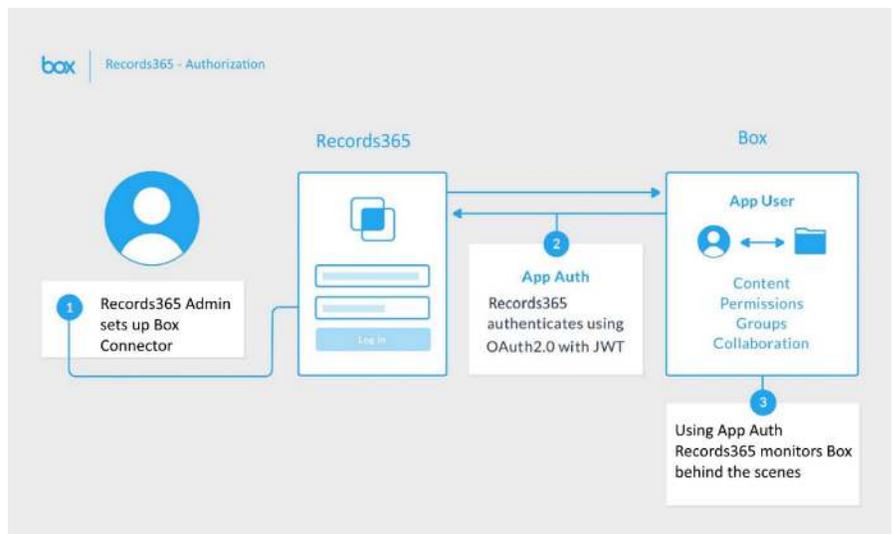

## SECURITY AND AUTHORIZATION

Records365 leverages app authentication via a Box Enterprise App for authorization to seamlessly manage your enterprise content over a secure channel and behind the scenes.

## ELIMINATE RETENTION RISK

Records365 manages the defensible disposition of any Box content once it has met its retention period. This eliminates risk to the organization, and ensures that businesses automatically manage their regulatory, legal, and information governance requirements around their Box content.

## ABOUT RECORDPOINT

Founded in 2009, RecordPoint is a global records management and compliance solution provider and pioneer of cloud-based recordkeeping. Recognized by Gartner in 2018, RecordPoint is leading the way in the content services segment and providing organizations with the ability to manage records from across multiple services and platform using a single, federated solution.

With support for Office 365, SharePoint, File Shares, E-mail, Box, Dropbox, Google Drive, and many other applications, RecordPoint is demonstrating how easy federated compliance can be with a modern, trusted cloud solution.
